Profile

Self-taught and **dedicated**. A web developer with the ability to assimilate work under pressure and great facility for **teamwork**, no matter if it's locally or remote. He brings his experience to **find solutions** for all the possible problems that can happen in all the project stages, and brings calm to the customer.

Knowledge

JS, TypeScript, HTML5, CSS, Sass, React JS, StyledComponents, Start and planning digital projects, UX, Gamification

Abilities

Team management, ability for work under pressure, great facility for **teamwork**, good speaker, **great personal relationships**, ease for remote work.

Experience

Huge

Semi-senior Software Engineer.

On “Huge” I worked for GPay and GoogleWallet, the main of my functions was to modify and create components for their pages, also load and admin content through their own CMS (November 2022 - July 2023).

Mill 5

Software Engineer.

Here I worked for customer Alyce, my main function was to create new functionalities on react components implementing TypeScript, refactor old components made on JS to TS, and also participate actively in the sprints planning, tasks grooming and the new tech implementation decisions.
(June 2022 - September 2022).

BairesDev

Web UI Developer.

Here I worked on projects for Fabric Inc and Via Productions, the main function was to translate old vanilla js functions to react js components implementing TypeScript and did maintenance to legacy code.
(November 2020 - February 2022).

Globant

Web UI Developer.

A totally new experience about development work, a lot of new knowledge and a necessity to keep learning. Here I worked on projects like Avianca My Crew, a developed app on Angular. On this project my main function was to develop the view of some components being fidel with the original design. Cineplanet site, optimize and change some react components was part of my functions and in Tribune, my main task was make some changes to currently existent functions and migrate some components on Html5 and JS to React Js.
(June 2017 - May 2020).

TBWA COLOMBIA

Web developer / Lead web developer.

Here I worked as a full stack developer, developing sites like cotton USA colombia on html5 with JQuery and bootstrap, seasonal sites for Chocolates Jumbo, getting info from the users social media (facebook, instagram, twitter) and publishing it on the site and in a live concert, the sites was builded on html5, JQuery, php, MySql databases, and SASS for the styling, Also worked as Team lead, heading projects for customers like Chocolates Jet “álbum Planeta sorprendente”, a full user experience, filling on a digital way a stiker’s album that after only was possible on physical way, for this development we has to work on remote with a partner team on Argentina, so one of my functions was coordinate the communications, advances, and reviews of the project process. Here I worked on projects for customers like Chocolates Jet, Chocolates Jumbo, Jumbo Cencosud, Grupo Argos, SURA, ...
(June 2012 - January 2017).
